

Statistical review of NHMRC Grants 2016

Stats Central, UNSW's new statistics consulting unit, announces its first service for researchers starting January 11, 2016.

Researchers preparing NHMRC grants can request a statistics review. Reviews will be allocated to a suitable reviewer by a panel comprising Prof Sue Wilson, Prof David Warton and A/Prof Andrew Hayen.

Before submitting for review, it is strongly recommended that you

- Familiarise yourself with UNSW's Research Code of Conduct.
- Consult relevant checklists for authors, which provide guidelines on statistical design and presentation of research data for publication. Some starter links are provided below.

To request a statistics review for your NHMRC grant, please email:

stats.central@unsw.edu.au

Proposals received on or before **Feb 18** will receive a full review

Proposals received between **Feb 19 and Feb 29** may receive a limited review or none, depending on demand
